

WEB DESIGNING (TASK 2)

Project Title: E-commerce Product Page

Task Description:

Design a product detail page for an e-commerce website selling a specific product category (e.g., shoes, electronics).

Requirements:

- Create wireframes and a design mockup for the product page.
- Include product images, description, price, and customer reviews.
- Implement the design using HTML, CSS, and JavaScript for interactive elements like image galleries or product variants.
- Optimize the page for SEO and fast loading times.
- Ensure the design is responsive and works on different devices.
