

PYTHON DEVELOPER (TASK 2)

Project Title: E-commerce Website with Django

Task Description:

Create a simple e-commerce website using the Django or Flask web framework. Implement features like user authentication, product catalog, and product details by database and shopping cart. You can also incorporate payment gateways like Stripe or PayPal, etc. But it is not required.

Skills:

- Django
- Database management (e.g., PostgreSQL)
- Web development
- User authentication
- Payment integration
